Wayne,

According to Kyle Keegan, they completed well UWBZ34 yesterday and constructed the well today. UWBZ34 is located at the SW corner of the site. According to Kyle, he had a positive dye test at 170'; cuttings were relatively cool.

They will be back onsite next Tuesday with 2 rigs. They did not complete previous well LSZ43 due to the previously reported steam issues; they left the rig set up on that and will complete drilling next week once they get the proper safety equipment in place.
